

# Tonic

A global retail spotlight with exceptional colour quality

# Create a consistent and high quality global brand experience with Tonic

Specify worldwide with global certification and an integrated multi-voltage driver.

- A truly global spotlight fully certified for use worldwide and equipped with a multi-voltage driver
- Engage customers with exceptional colour quality (CRI >90) that vibrantly and vividly illuminates products and displays
- Integrate across different architectural styles and applications with a modern tubular design and integrated power supply, available with a wide range of configurations
- Reduce energy consumption by more than 40% with advanced LED technology and highly efficient optics that deliver high efficacy (90 Llm/W)
- Interchange the lenses with a choice of four beam angles, from spot to very wide flood, to ensure flexibility to adapt to different lighting requirements

#### Increasing retail sales and efficiency is easy with Tonic

Helping to enhance the customer experience and to increase their time in store, retail lighting is proven to be an effective marketing tool with an integral and transformational role.

Regardless of whether you're illuminating a supermarket, jeans store or bike shop, choosing the Tonic spotlight will provide an engaging customer experience with vivid, high quality general and accent lighting that correctly displays colours and textures. Specifically designed for retail applications, Tonic offers the flexibility to adapt to changing store concepts with features including interchangeable optics and precise aiming. Tonic's high energy efficiency also reaps significant savings (more than 40%) in comparison to traditional technologies, which is especially beneficial for stores with long operating hours.

For global brands, Tonic is a truly global spotlight. Worldwide availability and short delivery times ensure Tonic is easy to specify regardless of where your stores are. With Tonic you can move forward and grow with a flexible, consistent and cost-effective lighting solution.

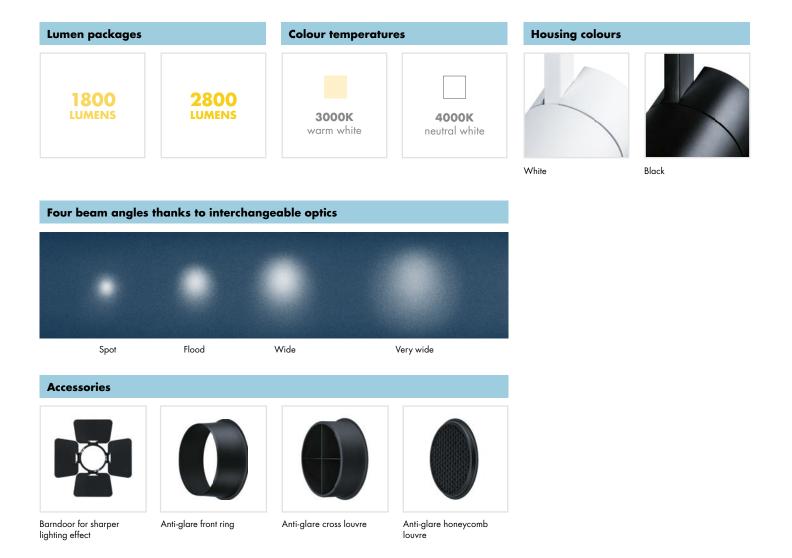

### WORLDWIDE AVAILABILITY

A truly global spotlight with certifications including CE, CCC, UL, RCM and EAC, and an integrated multi-voltage driver

Easy, flexible lighting design

The Tonic spotlight is easy to understand and specify with clear product options.

# Installation

From replacing existing three-phase track installations on a global scale to adapting to seasonal product displays, installing Tonic is easy and flexible.

#### Install worldwide

Tonic is certified for Europe, Russia, North America, Australia and China with global certifications including CE, CCC, UL, RCM and EAC. An integrated multi-voltage driver ensures you can use this spotlight anywhere.

#### **Directly replace HID lamps**

Saving time and money, Tonic features a global 3-phase GA69 certified track adapter for use with existing 3-phase track installations. You can easily and directly replace up to 50W HID lamps with Tonic.

#### **Rotate and tilt**

You can rotate Tonic 350° and tilt 90° to easily adjust to changing product displays and store layouts.

**Mounting options** 

Track or single point mounted.

Identify the right location of the spotlight near the track installed.

Select the correct phase.

Position the spotlight inside the track.

Rotate wheel to select the correct phase (1-3).

Close the lever and lock the spotlight.

Adjust the spotlight according to individual needs.

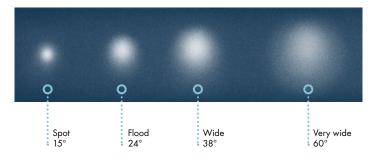

Once closed, the spotlight is locked into position.

The spotlight is now ready to use.

# **Optics**

Interchangeable optics adapt to changing store concepts.

Tonic lenses are easily interchangeable between spot, flood, wide flood and very wide flood beam angles. This ensures adaptability for both current and future lighting requirements. Using Tonic's front ring tool, removing the click-in ring is simple.

Tonic's advanced optics also optimise the shopping experience with iridescent-free lighting and a uniform lighting effect that prevents spots, shadows, dark areas and spill light.

For aesthetic consistency when directly replacing older technologies, Tonic features facetted lenses that mimic traditional reflectors.

- Flexible lighting solution possible through different beam angles
- Create different lighting scenarios
- Create both uniform illumination and accent lighting
- Easy to change lenses, which generate different effects from the same product

Using the front ring tool (supplied with the lens) push the metal rod into the gap on either side of the plastic pin.

Turn the spotlight upside down and carefully remove the lens. Do not handle lense without gloves.

Pull the ring towards you, partly removing the ring.

Place the spotlight on an even surface with the aperture facing upwards and fit the new lens.

Repeat the process 3 times for gaps a, b and c.

Replace the front ring into the spotlight housing.

Remove the front ring.

Push the ring into position, this will be confirmed by click as it locates into the housing.

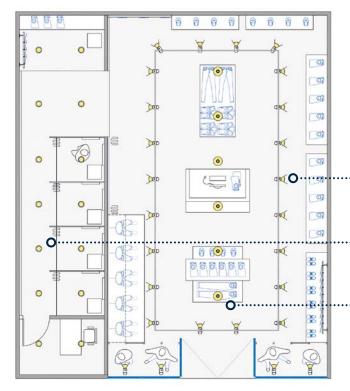

# Refurbishment

## Example: Denim fashion shop.

A denim shop needs good colour rendering to create a quality light which enhances the space and attracts customers by giving a positive impression of the store and its products. Specifically designed for retail applications, Tonic provides accent or uniform lighting effects and reduces energy consumption by more than 40% in comparison to non-LED alternatives. Ideal for refurbishment projects, you do not need to change the existing track of the conventional installation – just the light fittings. For the changing rooms and corridors, the Tonic spotlights are complemented with Thorn's Chalice Pro downlights. The downlights create an open atmosphere for the surroundings and avoid contrasts in the changing rooms with a good overall illumination.

For payment areas and product demonstration desks, Thorn's Glacier II LED pendant luminaires provide a different architectural perspective and lighting effect.

#### Luminaires New

14 Pieces Chalice Pro LED CRI>90 1600lm >95Llm/W

6 Pieces Glacier II LED CRI>80 2710lm >92Llm/W Luminaires Before

- 24 Pieces 1x35W HIPAR 111 Spot 1630lm 37Llm/W
- 14 Pieces 2x18W TC-DEL Downlight 1478Im 41Llm/W 6 Pieces 1x35W HIT-CE HF Pendant 2198Im 75Llm/W

Lighting Management Switching ON and OFF

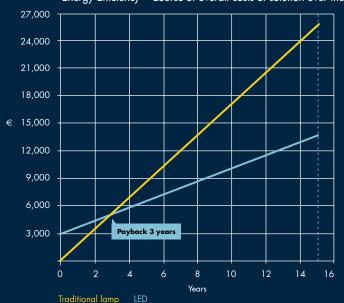

### **Calculation Period**

15 Years

# Energy saving opportunities

Ideal for refurbishment projects, Tonic reduces energy consumption by more than 40% in comparison to non-LED alternatives.

Retail lighting is energy intensive with long operating hours increasing the need for energy efficient lighting. With efficient LEDs and a payback time of just three years, switching to Tonic offers attractive financial savings.

#### Reduce energy costs by more than 40% with Tonic. Energy Efficiency - Course of overall costs of solution over lifetime:

Scheme details: Retail space: 87.5m<sup>2</sup>

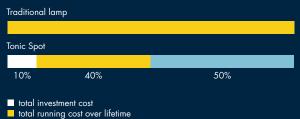

Energy costs: 0.12 €/kWh

Changing lamps every 2 years for the traditional/non-LED solution LED: Cleaning the luminaires every 3 years

Operating hours: 3128.5 h/a

All calculations are based on an annual increase of energy and operating costs of 5%.

### Investment costs vs. running costs of solution (absolute)

saving

# **Product specification**

A global retail spotlight with exceptional colour quality.

#### Application
