

## **Voyager Square: A smooth design with high recognition range and IP65 protection**

*The new Voyager Square safety sign luminaire from Thorn is strong, smooth and highly protected to deliver the ultimate performance when it's needed the most.*

Dornbirn, Austria / April 2021 - Emergency lighting can make all the difference during a crisis. In emergency situations, it has to be highly reliable and clearly visible. High quality emergency lighting can save lives and the Voyager Square has been created to deliver maximum reliability and visibility.

### **Designed for multiple applications**

Voyager Square is a wall mounted exit sign that can be used for many applications thanks to its IP65 protection and IK10 rating. The square shaped exit sign can be seen from up to 44 m, which makes it suitable for many applications like production halls, logistics, car parks or DIY stores. With a luminance level of 500 cd/m<sup>2</sup> in the white area, Voyager Square fulfils the highest standards regarding illumination (acc. to DIN 4844).

### **Smooth, sleek and robust**

Its smooth, sleek and robust design makes the Voyager Square an unobtrusive addition to any location. Its slim and compact form means it can be easily installed and maintained, and with the multiple pictogram options available, it is very versatile. Its highly protected surface is not only functional against dust and water, but also extremely easy to clean. Thanks to the IK10 rating, Voyager Square is also very robust against mechanical shocks.

### **The self-contained version**

Voyager Square is available as a self-contained luminaire with Autotest/ DALI-test function and in central battery options. The self-contained version is operated by long-living lithium iron phosphate batteries with a 3 year guarantee. Thanks to the integrated PROset functionality, the luminaires can be addressed, configured and maintained easily over NFC via the PROset Pen or PROset App.

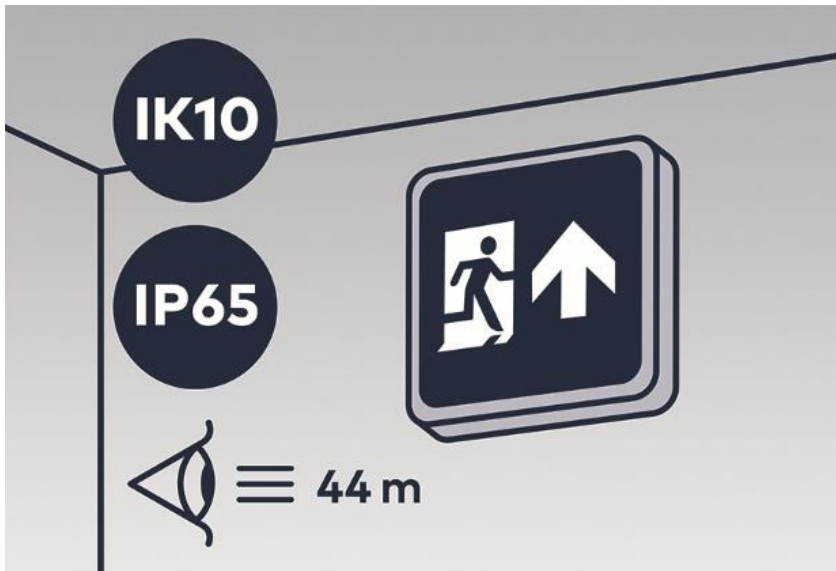

Gregor Mayr, Product Manager Emergency Lighting, says: "Testing, reiteration and continued development have all been significant steps in our journey in creating Voyager Square. This compact, versatile and most importantly, resilient and reliable emergency luminaire is the perfect unobtrusive, yet powerful emergency solution Thorn offers today".
