## **CONTUS**

**An efficient, flexible trunking system with best-in-class installation time and easy maintenance.**

A new indoor trunking and batten system from Thorn Lighting has been designed for rapid installation and easy maintenance.

Through its high luminance, efficiency and range of optics such as shelf beam, narrow beam and wide beam, Contus battens deliver a uniformity of light that best supports different tasks and spaces, whether that's in a factory, warehouse or a supermarket.

Contus trunking is ideal for both refurbishment as well as new build projects, both with their own complexities regarding energy efficiency, cost reduction and installation time constraints. Highly flexible, Contus is easy to suspend or mount from the ceiling and is also fully adjustable and can adapt to a space if the layout changes over time.

Rated IP50, Thorn's Contus battens are protected from dust and dirt ingress which helps to preserve the light efficiency through the precision optics. With up to 163 lm/W efficacy, up to 10,000 lumens and 50,000 hours lifetime (L80:B10), Contus can also be relied upon to perform.

Large spaces can be lit optimally, boosting productivity and enhancing safety in multiple applications including logistics, industry and retail.

Peter Jezsowiczki, Product Manager said, *"Complex by design but simple by nature: this is what makes Contus a solution that's extremely easy to plan, install, use and maintain. Consequently, Contus allows our customers to focus on their core business, knowing their lighting has been taken care of."*

Visit [www.thornlighting.com](http://www.thornlighting.com) to find out more about Contus including its twist and lock mechanism, minimised glare and length availability. Plus, see how long it took an independent external consultant to install Contus compared with six different continuous-row LED trunking systems from other manufacturers.

To explain how Contus features can benefit the key industries of retail and industry, two versions of the Contus brochure are available via our website.
