

## **GRAFFITI – the new high-performance spotlights from Thorn Lighting with optical precision, optimised glare control and integrated driver.**

Graffiti is an attractive indoor luminaire that fits perfectly in retail applications. Available in two lumen packages (2800 lm and 3600 lm) with CRI 90 as standard and honeycomb louvre and protection glass attachments, this spotlight enhances the look of products on display while maintaining comfort for shoppers and workers alike.

Its 95mm body (available in black or white) can be mounted on either a three phase track or Thorn's Contus trunking system, meaning installation is both quick and adaptable.

With a long 50,000-hour lifetime and an efficient LED engine, Graffiti spotlights are ideal for both lighting refurbishments and new build projects.

Manufactured in Germany on an automated robotic assembly line, production speed and quality are assured while maintaining a low carbon footprint. The recycled aluminium spotlight body minimises the product's environmental footprint and promotes future recyclability.

Graffiti was developed with circular design principals in mind, with the ability to replace not only the luminaire's driver, but also the LED chip-on-board when returned to Thorn for upgrade or maintenance

Sven Scharfe, Product Manager for spotlights said, *"Graffiti is a really great addition to Thorn's indoor portfolio. Not only does it mean we can support customers across an increased range of applications – it also means we are contributing to greener solutions, ensuring projects are future-proof."*
