

THORN

Outdoor Lighting

Lighting people

Thorn Lighting part of the Zumtobel Group, is a globally trusted supplier of both outdoor and indoor lighting solutions.

Our 'smart' and sustainable lighting solutions create comfortable, fulfilling environments for people to live and work in more than 100 countries around the world.

From roads to cityscapes, sports facilities to buildings and their surrounds, we have built a strong reputation for reliability, functionality and technically advanced design.

Our mission is to provide products and services which make it easier for customers to specify, install and maintain good quality, energy efficient lighting.

Suncyl

Stand-alone renewable energy solutions for LED lighting

If you are looking for stand-alone or renewable energy lighting solutions, our hybrid solar and wind turbine Suncyl poles provide the necessary energy with no connection to the electricity grid.

Unlike conventional solutions with unsightly inclined solar panels, Suncyl poles are covered 360° with cells. Combined with Thorn LED luminaires, they offer highly attractive and effective solutions that blend smoothly into the landscape.

In addition, Suncyl poles can be centrally controlled with a GSM module. You can therefore monitor the dimming level and duration in order to maximise energy savings.

Suncyl is the most attractive solar pole solution on the market, allowing effortless integration with the environment

A maintenance-free wind turbine pole provides even more efficiency, particularly in winter.

Proven technology with more than 300 poles installed across three continents (Europe, Asia, Middle East) since 2009

Choice of three solutions:

- Solar
- Wind turbine
- Solar and wind turbine (hybrid)

Customisation is possible up to a height of 12 metres

Suncyl poles are compatible with all of Thorn's key LED luminaires

Solar pole

Aluminium pole with flange

Covered 360° with panels fitted with poly-cristalline cells to convert daylight into electricity, stored in concealed batteries

The same technology as conventional solar panels

Cells wrapped in a high strength (IK08) polycarbonate cover, which is self-cleaning when raining

Treated to aid cleaning in case of vandalism

100% recyclable

Vertical wind turbine

Minimum wind speed: 3.5 m/s

Solves the problem of electricity generation during the winter

No aerodynamic noise

Only compatible with laterally mounted LED lanterns

Urban lighting

Capoeira

A successful combination of functional and decorative features, the Decostreet range offers a wide variety of attractive designs that adapt themselves to your requirements. The simple shape of the oval dome (shown on these pages) has a modern appeal while the generous capacity of the round dome is more traditional.

With a choice of oval or round bowl and with a straight or conical ring, Decostreet offers great choice.

Mounted laterally or suspended, its two sizes allow the creation of harmonious lighting combinations for traffic lanes and pedestrian walkways.

www.thornlighting.com

Rue Doudeauville, Paris, France

Developed in association with the designer Sylvain Dubuisson as part of the contemporary lighting fixtures supplied to the City of Paris, this range of decorative luminaires is intended for lighting pedestrian precincts, pavements, squares and forecourts. Its characteristic slender fluid design is matched by its imposing glass and die-cast construction. The ribbed base masks the light source and diffuses a glare-free light, while the interior cone ensures a consistent spread of light towards the ground. An asymmetric version reduces the amount of light diffused to the façades. This range is also available for wall mounting, and harmoniously complements the street luminaire specifically designed for traffic lanes (see page 37).

Materials and finish

Base and canopy: die-cast aluminium

Reflector: aluminium

Diffuser: clear/ribbed glass

www.thornlighting.com/HALN

Discreet wall washer with visor for low glare illumination

- Discreet styling for easy integration with various architectures
- Pre-wired range for easy and quick installation
- Supplied complete with visor to avoid glare

Materials and finish

Body: anodised extruded aluminium, aluminium grey finish (close to RAL 9007)

End caps: anodised die-cast aluminium, grey finish

Stirrup: anodised die-cast aluminium, grey finish

Cover: toughened glass
H05RN-F 2 x 1mm² 0.35m long
IN/OUT cable

E/Fact Slim

www.thornlighting.com/EFCT

▲ Eglise de Chambly, France (60)

▲ Ile Monsieur – Saint Cloud, France (92)

A series of square or circular recessed walk-over luminaires compliant with EN60598-2-13: limited surface temperatures

- Designed in accordance with the new contact temperature norm: $<100^{\circ}\text{C}$ for conventional versions and $<40^{\circ}\text{C}$ for LED versions.
- Sealed to IP67 with die-cast aluminium body. Wide choice of sizes, frames, mounting depths, light sources and control technologies to suit application
- Tilting angle adjustment for semi-frosted glass versions (except asymmetrical light distribution (A/S) and E/Fact 1 18W TC-T)
- Integral power supplies, except E/Fact 0 20W QR-CBC which needs an external 12Vac and E/Fact 1 RGB

Materials and finish

Bodies: die-cast aluminium, ENAB44100 (copper free) with powdered paint finish for high corrosion resistance
 Frame: stainless steel AISI 316L (3mm thick) treated against corrosion or painted aluminium
 Retaining screws: stainless steel
 Front glass: toughened semi-frosted or frosted sodic glass.
 Gasket: anti-ageing silicon
 Recessing box: polypropylene
 Cable: H07RN-F, 1m for size 00 and 0.5m for E/Fact Slim size 1, 2 and 3.
 Holographic films: non-yellowing polycarbonate.
 Low temperature version.

Mica

www.thornlighting.com/MICA

▲ Château des Longues Allées Park, Montauban, France (82)

▲ Hotel Dieu, Belleville, France

Illumination is easy with the Mica range of recessed walkover luminaires. Particularly robust, Mica will bear the weight of vehicles. Its four versions with increasing sizes and power guarantee the right product for the application, whatever the required lighting effect, including route guidance, accent lighting, illuminating foliage, statues, structures and building facades. With such a variety of light sources, optics, accessories and finishes, it's easy to find a suitable solution with Mica.

Materials and finish

Bodies: die-cast aluminium, ENAB44100 (copper free) with powdered paint finish for high corrosion resistance.
 Frame: stainless steel AISI 316L (3mm thick) treated against corrosion or painted aluminium.
 Retaining screws: stainless steel
 Front glass: toughened semi-frosted, clear or frosted sodic glass.
 Gasket: anti-ageing silicon.
 Recessing box: polypropylene.
 Cable: H07RN-F 0.5m long for Mica Slim and Mica A versions and 0.8m long for Mica I and Mica B.
 Holographic films: non-yellowing polycarbonate.
 Low temperature version. 

Linn

www.thornlighting.com/LINN

Complete range of modular wall-mounted luminaires providing a wide selection for all types of pedestrian walkways

- The modular design offers an wide range of lighting possibilities
- With a compact body for easy integration with the pre-ordered recessed housing box
- Square or rectangular shape with a choice of four frames suitable for every environment

Materials and finish

Body: die-cast aluminium

EN AB 47100 powder coated anthracite grey finish (close to RAL 7043)

Cover: toughened glass, 6mm thick for square version and 8mm thick for rectangular version

Recessed housing: polypropylene with 40% talc added and polystyrene cores

Gasket: Dutral

Retaining screws: stainless steel

Axyl

www.thornlighting.com/AXYL

Compact wall-mounted floodlights create impressive lighting effects on façades

- High performance LEDs provide good spacing with outstanding lighting effects
- Choice of four lighting effects
- Floodlights with all components in the same housing
- Compact cube-shaped housing blends into its environment

Materials and finish

Body: die-cast aluminium

Sandy anthracite grey finish EN AB 47100

Cover: 4mm thick toughened glass

Mounting support: polycarbonate

Gasket: silicone

Retaining screws: stainless steel

Cesar

www.thornlighting.com/CESA

Cesar is a wall-mounted floodlight for illuminating façades with lighting that is both decorative and functional. Its simple vertical cylinder shape blends with the upwards and/or downwards light beams projected onto the façade. The wide choice of light sources and accessories ensures high quality lighting designs with narrow or diffused, symmetrical or asymmetrical effects, and colours (if required). The range is complemented by LED versions with their additional benefits: narrow coloured beam with low energy consumption and long life.

Materials and finish

Body and frame: die-cast aluminium EN AN4700 and extruded ENAW 6060 housing (copper free) with high corrosion resistance and powdered painted close to RAL 9007 with corrosion resistance. Other RAL colours available on request.

Reflector: pure aluminium.

Front glass: toughened glass, thickness 6mm - size 1, 8mm - sizes 2 and 3, 12mm - size 4.

Retaining screws: stainless steel

Gasket: silicone

Holographic films: non-yellowing polycarbonate

EyeKon

www.thornlighting.com/EYKL

Vandal-proof IP65 bulkhead

- Aluminium construction, sealed to IP65
- Designed to spread light sideways, allowing wider spacing without leaving dark areas
- Bezel, cross, visor and halo visor decorative features
- Highly efficient LED version (up to 1500lm) available with built in detection system and optional corridor mode

Materials and finish

Housing and decorative feature (cross, bezel and visor): die-cast aluminium

Diffuser: opal or clear polycarbonate

Reflector: aluminium

Gaskets: extruded silicone rubber

EyeKon L

EyeKon S

Orus

www.thornlighting.com/ORUS

A new way to design a lighting installation! Orus is an innovative low-mounted (0.90m) shallow beam street luminaire. With Orus it's now possible to design a road free of lighting poles where direct light provides effective, efficient and comfortable lighting with minimal energy consumption and simplified installation and maintenance operations. Orus meets the requirements of projects where conventional lighting installations (with pole, bracket and lantern) are unsuitable, including in urban environments. Includes wood or Ductal concrete bollard options.

Materials and finish

Body: die-cast aluminium
 Bollard: 3mm steel powder coated grey (RAL 9006) or concrete, texturised dark grey
 Enclosure: UV stabilised polycarbonate protected against graffiti and with extra scratch resistant treatment
 Reflector: pure aluminium with high reflectance coating
 Tamper-proof screws and bolts: stainless steel
 Gaskets: silicon
 Stirrup: die-cast aluminium

Wooden Bollard

Stirrup

Concrete Bollard Ductal®

Steel Bollard

Tea

www.thornlighting.com/TEA1

Stylish and sturdy bollard enhances urban spaces

- Contemporary design which blends into the environment
- Robust reliable construction, IK10 impact resistance and vandal resistant
- Efficient and durable LEDs requiring little maintenance
- Efficient asymmetric light distribution compatible with the interministerial decree governing disabled access (PMR) and ULOR = 0% to limit obtrusive light. 

Materials and finish

Body and bezel: stainless steel, electro-plated zinc
Diffuser: clear 5mm polycarbonate plate
Body and bezel colours: black (RAL 9005)

Promenade

www.thornlighting.com/PMLD

This bollard's simple pure lines imply strength and harmony. The enhanced, uniform and glare-free distribution of this functional white lighting contributes to pedestrians' comfort. LED versions offer customisation possibilities in terms of colours, reliability and reduced operating costs. Promenade LED offers bollard or parapet versions. It provides an effective security solution for areas where direct switch-on with 100% of luminous output is required.

Materials and finish

Head and body: powder coated die-cast aluminium LM6, anthracite (close to RAL 7024)

Top cone: opal polycarbonate

Diffuser: clear polycarbonate with internal sand blasted anti-glare band

Adelie Bollard

www.thornlighting.com/ADLB

Elegant vandal resistant bollard with high performance optic offering a comfortable light and energy saving solutions

- Best in class LED optic provides a comfortable, low glare direct and indirect light with asymmetric or symmetric distribution, sympathetic to users with a lower viewing angle
- Durable and vandal resistant (IK10 40 joules for the slim version)
- Bi power dimming and presence detection options reduce energy consumption
- Available in two sizes – slim and wide – with the wide version also suitable for use as street furniture
- Optional decorative RGB colour band
- Complements the distinctive Adelie post top lantern
- Slender slim size with light distribution compatible with the interministerial decree governing disabled access (PMR) 

Materials and finish

Column and base: aluminium (EN AW 6060)

Canopy: die-cast aluminum (EN AC 47100)

Diffuser: clear anti UV Polycarbonate

Reflector: white Polycarbonate

Gear Box: Polypropylene

Canopy and Column colour: powder coated dark grey (close to 7043)

D-CO LED Bollard

www.thornlighting.com/DCOB

A timeless bollard offering comfortable visual guidance

- Comfortable white light with no glare provided by a semi-opal anti-UV PC diffuser
- Suitable for any application thanks to high specs and two heights
- 60,000 hour lifetime (L80, 25°) ensures low maintenance costs
- Flange mounting, compatible with root spikes

Materials and finish

Top and body: aluminium, powder coated anthracite grey finish (close to RAL 7043)

Diffuser: UV stabilised semi-opal polycarbonate

Lighting control

Switching off the lights saves energy! Of course switching off the lights would be effective in saving energy, but safety would be compromised. Did you know?

- **Power reduction and presence detection,**

satisfy safety guidelines and regulatory requirements while bringing **energy savings**.

LED technology has major advantages: Instantaneous **switch-on with 100% available light**. LED gives a reassuring light.

Its **colour rendering** is vastly superior to that of conventional lamps and enhances the **attractiveness of urban areas**.

Centralised solutions: managing the lighting of a street, district or town; monitoring energy consumption and programming maintenance visits, thanks to data fed back to a central control point.

Power reduction

As the first stage in lighting management, reducing the power of lanterns brings a 20 to 40% energy saving.

50% light reduction, integral clock with automatic adjustment

Presence detection

The versatility of LED technology and the use of presence detection now makes it possible to manage public lighting in accordance with traffic frequency.

We offer two operating modes : ON/OFF switching or change from stand-by to full power. With different detection modes, infrared or high frequency, our solutions meet all your requirements.

Legend LED on detection sleeve

Luminaire with integral cell

**Presence undetected :
luminaire is on stand-by**

**Presence detected :
luminaire 100% ON**

Change from stand-by to full power

As the preferred solution, this mode maintains a permanent minimum level of illuminance and brings a feeling of safety. When presence is detected, the level of illuminance changes instantaneously to its maximum for safe movement.

Centralised lighting control systems

1 Motorway/main road

Dimming according to traffic conditions

Performance table	
Energy savings	★★★★
Maintenance cost savings	★★★★
Comfort and safety	★★★★

2 Public playground

Operating on full power during playtime can also signify that closing time is approaching

Performance table	
Energy savings	★★★
Maintenance cost savings	★★
Comfort and safety	★★★

3 Town centre/pedestrian precinct

Dimming while maintaining an adequate level of lighting intensity and ensuring comfort and safety

Performance table	
Energy savings	★★★
Maintenance cost savings	★★★★
Comfort and safety	★★★★

Thorn offers comprehensive remote management solutions for the monitoring and supervision of lighting installations.

Whether it's for public or private lighting installations or illuminations, you will always find the solution that meets your needs.

Example of an installation controlled by powerline

Example of installation managed by Radio-Fréquence

4 Illumination

Extremely versatile system for easily adapting operating hours according to events

Performance table

Dynamic architectural lighting

From creating visual interest in urban spaces to electronically playing with light colours, lighting is always inventing new theatrical effects

To create and transmit emotions with electronic controls, the colour mixture is monitored for dosage and duration.

LEDs are the preferred light source for dynamic lighting. RGB LEDs enable the colour mixture to be produced at the very source of the light.

DMX helps create and control programmable lighting sequences according to the calendar

Thorn offers a comprehensive range of systems (Sensa, etc) suitable for all sizes of projects. The various linking systems: wired connection, radio, Internet etc., can be used to adapt communications to the project's configuration.

Technical support is available throughout the project (from design to commissioning). Please contact your local sales team for more information.
